 11. Marking guide — model answers to the practice examination — full version only
 12. Exam technique and revision checklist — full version only
-

1. Computer hardware and software, basics

Hardware is the physical, tangible components of a computer system. **Software** is the programs and instructions that run on hardware, divided into system software and application software.

Sample of the practice examination (Question One of Five)

Note on format. The full paper includes a complete practice examination laid out the way a real KASNEB CS paper is laid out — timed, five compulsory 20-mark questions — so you can rehearse the exact exam format before sitting the real thing. This is an original practice paper, **not a reproduction of any actual KASNEB past paper.**

CS FOUNDATION LEVEL — INFORMATION COMMUNICATION TECHNOLOGY (PRACTICE PAPER)

TIME ALLOWED: 3 HOURS

*Instructions to candidates: Answer ALL FIVE questions. Each question carries 20 marks.
Show all workings clearly.*

QUESTION ONE

(a) Distinguish between computer hardware and software, with TWO examples of each. (12 marks)

(b) Distinguish between system software and application software. (8 marks)

(Total: 20 marks)

Questions Two, Three, Four and Five — plus the full marking guide with model answers to all five questions — are in the full version.

Unlock the full paper

The complete version includes databases, networks, email governance practice, information security, board portals, data protection, a fully worked information-security question, the complete five-question KASNEB-style practice examination with a full marking guide, and an exam technique and revision checklist.
