

Introduction to Computing — PREVIEW

Course: DICT — Diploma in Information Communication Technology | **Level:** Level I

This is a free preview. It shows the exam-paper layout used throughout the full document, plus the introduction section.

Contents (full paper)

1. What is a computer system? — *included in this preview*
 2. The parts of a desktop/laptop computer — full version only
 3. Categories of everyday software — full version only
 4. Files, folders, and basic file management — full version only
 5. Storage devices and units of measurement — full version only
 6. Ports and connecting peripherals — full version only
 7. Safe computing practices — full version only
 8. Basic troubleshooting — full version only
 9. Using the Internet safely and effectively — full version only
 10. Computer ergonomics and care — full version only
 11. Full worked question — storage capacity calculation — full version only
 12. Practice examination — KASNEB-style paper — *Question One shown below; Questions Two–Five full version only*
 13. Marking guide — model answers to the practice examination — full version only
 14. Exam technique and revision checklist — full version only
-

1. What is a computer system?

A **computer system** is the combination of hardware (the physical machine you can touch), software (the instructions that tell the hardware what to do), and data (the information being processed) working together to perform useful tasks. At this practical, entry level, the goal is confident everyday use of a computer — knowing its parts, its common software, and how to use and look after it safely — rather than deep technical theory.

Sample of the practice examination (Question One of Five)

Note on format. The full paper includes a complete practice examination laid out the way a real KASNEB DICT paper is laid out — timed, five compulsory 20-mark questions — so you can rehearse the exact exam format before sitting the real thing. This is an original practice paper, **not a reproduction of any actual KASNEB past paper.**

DICT LEVEL I — INTRODUCTION TO COMPUTING (PRACTICE PAPER)

TIME ALLOWED: 3 HOURS

Instructions to candidates: Answer ALL FIVE questions. Each question carries 20 marks. Show all workings clearly.

QUESTION ONE

- (a) Define a computer system, identifying its three main components. (6 marks)
- (b) Describe FOUR physical parts of a desktop or laptop computer, stating the function of each. (8 marks)
- (c) Distinguish between an operating system and productivity software, giving one example of each. (6 marks)

(Total: 20 marks)

Questions Two, Three, Four and Five — plus the full marking guide with model answers to all five questions — are in the full version.

Unlock the full paper

The complete version includes file and folder management, storage devices and units of measurement, ports and peripherals, safe computing practices, basic troubleshooting, safe and effective Internet use, computer ergonomics, a fully worked storage-capacity question, the complete five-question KASNEB-style practice examination with a full marking guide, and an exam technique and revision checklist.
