 11. Marking guide — model answers to the practice examination — full version only
 12. Exam technique and revision checklist — full version only
-

1. The accounting equation and double entry

The accounting equation — **Assets = Liabilities + Capital** — must always balance. Every transaction is recorded using **double entry**: each transaction has a debit and an equal, corresponding credit. Debits increase assets and expenses (decrease liabilities, capital, income); credits increase liabilities, capital and income (decrease assets and expenses).

Sample of the practice examination (Question One of Five)

Note on format. The full paper includes a complete practice examination laid out the way a real KASNEB CIFA paper is laid out — timed, five compulsory 20-mark questions — so you can rehearse

the exact exam format before sitting the real thing. This is an original practice paper, **not a reproduction of any actual KASNEB past paper.**

CIFA FOUNDATION LEVEL — FINANCIAL ACCOUNTING (PRACTICE PAPER)

TIME ALLOWED: 3 HOURS

Instructions to candidates: Answer ALL FIVE questions. Each question carries 20 marks. Show all workings clearly.

QUESTION ONE

- (a) State the accounting equation and explain why it must always balance. (6 marks)
- (b) Outline the FOUR common books of original entry. (12 marks)
- (c) State ONE limitation of a trial balance as a check on accuracy. (2 marks)

(Total: 20 marks)

Questions Two, Three, Four and Five — plus the full marking guide with model answers to all five questions — are in the full version.

Unlock the full paper

The complete version includes year-end adjustments, bad debts and provisions, the statement of profit or loss and financial position, the statement of cash flows, why this matters to an analyst, a fully worked adjustments question, the complete five-question KASNEB-style practice examination with a full marking guide, and an exam technique and revision checklist.
